

## CE • CERAMIC BASINS

Ceramic Basins are made out of liquefied fireclay which is poured into a mould and allowed to set before being hand finished. A ground glass glaze would typically be sprayed over the basin before the final firing.

This long-lasting, durable material suits a simple and minimalistic bathroom suite as well as a traditional Victorian look. Stains are easily removed and ceramic is generally easy to clean to maintain a shiny appearance. The slight ripples occasionally seen along its surface are often mistaken for flaws these are actually part of the ceramic basins characteristics.
