

CE • CERAMIC BASINS

Ceramic Basins are made out of liquefied fireclay which is poured into a mould and allowed to set before being hand finished. A ground glass glaze would typically be sprayed over the basin before the final firing.

This long-lasting, durable material suits a simple and minimalistic bathroom suite as well as a traditional Victorian look. Stains are easily removed and ceramic is generally easy to clean to maintain a shiny appearance. The slight ripples occasionally seen along its surface are often mistaken for flaws these are actually part of the ceramic basins characteristics.

Rose Gold overflow ring is an optional extra.
