

Thank you for choosing CALYPSO bathroom furniture.

By following some simple care and cleaning guidelines, Calypso furniture can be expected to give many years trouble free service.

Calypso bathroom furniture is designed to be used within domestic environments. Adequate ventilation is key. As with all timber products, bathroom furniture will be adversely affected if subject to excessive moisture on the surface or in the atmosphere. It is strongly recommended that a suitable bathroom extractor fan is installed to prevent condensation building up and to prevent damage to the furniture.

Any cut edges must be sealed with a good quality bathroom sealant, especially the rear of any trimmed worktops. Failure to do this will invalidate the warranty. It is recommended that a silicone sealant is applied to all points where worktop or furniture abuts a wall, to prevent capillary action causing water ingress into the units.

All water spills and sprays must be wiped clean and mopped dry immediately to prevent water marks or other damage.

On completion of installation, all sawdust must be removed from the units, and drawer runners inspected carefully with any dirt or grit being removed to ensure a smooth running action prior to full use.

Calypstone worktops can be kept in prime condition with the use of one of our Calypstone Care Kits which can be purchased from your Calypso dealer.

Never use chemical or abrasive cleaners, bleach or furniture polishes on any bathroom furniture as the finish can be affected. Clean only with a soft damp cloth and a mild soap solution as necessary.

Solid Oak is a very hard-wearing material and its looks are enhanced with wear over the years. Occasional application of a wax-based furniture polish should be all that is needed to maintain its finish. **DO NOT USE** household cleaners or abrasive powders on oak, and remove any spills or stains immediately with a soft damp cloth and mild detergent (washing-up liquid). Excessive moisture or water spills will darken the oak surface.
